Professional Summary

Passionate Full-Stack Developer specializing in the MERN stack. Experienced in building scalable applications, secure authentication systems, and responsive UIs using modern tools like TypeScript and Tailwind CSS. Dedicated to solving complex problems with clean, practical code.

Projects

Hirred:A Job Portal
Technologies:-React JS, supabase, Clerk, Tailwind Css

- Developed a **full-stack job portal web application** using modern technologies (React, Supabase/Auth integration) to enable job listings and interactive user experience.
- Implemented **user authentication, dynamic job management, and responsive UI flows**, allowing users to browse and interact *with* job postings seamlessly.
- Deployed the project live (**Netlify**) and maintained source code on **GitHub**, showcasing real-world full-stack project delivery and version control practices.

QuickKart:An Ecommerce Web
Technologies:-React JS,Clerk, Tailwind Css

- Built **QuickKart**, a responsive **e-commerce web application** using **React** and modern frontend practices to deliver seamless browsing and shopping experiences. (Live: https://quickkart69g.netlify.app/ | Code: https://github.com/AbhiSecWizard/QuickKart)
- Integrated **product listing, cart management, and dynamic UI state** to simulate core e-commerce functionality, showcasing skills in React state handling and component architecture. (Live & Code)
- Deployed the application on **Netlify** and maintained version control on **GitHub**, demonstrating end-to-end project delivery and real-world development workflow. (Live & Code)

Authentication Web App
Technologies:-React JS, Tailwind Css , MongoDb, Express, Node Js , JWT token

- Developed a **full authentication system** using the **MERN stack**, creating secure backend APIs with Express & MongoDB and a dynamic React frontend for user login/signup functionality. (Backend: https://github.com/AbhiSecWizard/AuthMern-Backend- | Frontend: https://github.com/AbhiSecWizard/AuthMern-Frontend)
- Implemented **JWT authentication, protected routes, and state management**, ensuring secure access control and a seamless user experience in the deployed application. (Live: https://auth-mern-frontend-wnmb.vercel.app/)
- Deployed the frontend on **Vercel** and maintained clear project structure and version control via **GitHub**, demonstrating end-to-end full-stack development proficiency.

Skills

- HTML5, CSS3 , GSAP , Tailwind CSS, JavaScript , MongoDB, Express, Node Js, React Js , Material UI
  Ai Tools Use (Prompt Engineering) , Excel(1.5yr Exp.),Tally Prime(1.5yr Exp.)

Education

Bachelor of Computer Applications (BCA) — Pursuing (2024 – Present)
College started in 2024
Senior Secondary (Class 12th) – Arts Stream (Economics) *— 80% (2024)*
GSBV School
