Professional Summary

Passionate Full-Stack Developer specializing in the MERN stack. Experienced in building scalable applications, secure authentication systems, and responsive UIs using modern tools like Tailwind CSS. Dedicated to solving complex problems with clean, practical code.

Projects

Forever E-Commerce Web (Live)

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary, JWT, Stripe/Razorpay

- Developed a full-stack MERN e-commerce platform with a separate customer storefront and admin dashboard, supporting product browsing, cart management, order placement, and order tracking through a clean, modular REST API architecture.
- Implemented secure JWT-based authentication and role-based access control, along with Context API state management, dynamic product filtering, sorting, and search, and integrated online payment gateways for seamless checkout.
- Built a responsive, mobile-first UI using React and Tailwind CSS, and integrated Cloudinary for optimized image uploads and delivery, enabling admins to add, update, and manage products and orders in real time.

E-Learning-LMS Web(live)

Technologies:-React.Js, Node.js , Tailwind Css RTK query, Cloudnary, MongoDb.

- Developed a scalable full-stack LMS utilizing React, Redux Toolkit, and Node.js/Express, features clean multi-role system architecture enabling seamless flows for both instructors and student course trackings.
- Integrated robust state management and optimization techniques, implementing advanced RTK Query for efficient dynamic data caching, custom theme contexts, and seamless API-driven dashboard rendering.
- Engineered highly responsive and modern front-end components using Tailwind CSS v4 and Shadcn UI, boosting application usability with fully dynamic, fluid Light and Dark mode transitions across complex data grids

Authentication Web App(live)

Technologies:-React JS, Tailwind Css , MongoDB, Express, Node Js , JWT token

- Developed a **full authentication system** using the **MERN stack**, creating secure backend APIs with Express & MongoDB and a dynamic React frontend for user login/signup functionality. (Backend: <https://github.com/AbhiSecWizard/Mern-Auth-app/tree/main/server-> | Frontend: <https://github.com/AbhiSecWizard/Mern-Auth-app/tree/main/client>)
- Implemented **JWT authentication, protected routes, and state management**, ensuring secure access control and a seamless user experience in the deployed application
- Deployed the frontend on **Vercel** and maintained clear project structure and version control via **GitHub**, demonstrating end-to-end full-stack development proficiency.

Skills

- *HTML5, CSS3 , GSAP , Tailwind CSS, JavaScript, TpyeScript, MongoDB, Express, Node Js, React Js , Material UI Ai Tools Use (Prompt Engineering) , Excel(1.5yr Exp.), Tally Prime(1.5yr Exp.)*

Education

Bachelor of Computer Applications (BCA) — Pursuing (2024 – Present) College started in 2024

Senior Secondary (Class 12th) – Arts Stream (Economics) — 80% (2024) GSBV School
